"As a doctor, as well as a mother and a world citizen, I wish to practice the ultimate form of preventive medicine by ridding the earth of these technologies that propagate disease, suffering, and death."

-- Dr. Helen Caldicott

On August 6, 1945 the US dropped an atomic bomb on Hiroshima, Japan, and three days later another one on Nagasaki. More than 100,000 people, mostly civilians, were killed. Fortunately, nuclear weapons have not been used again, but they remain a constant threat. Thousands of nuclear weapons remain on alert, ready to be fired at a moment's notice. These bombs could go off at any time by accident or at the hands of terrorists.

Recognizing the danger, most nations signed the Non-Proliferation Treaty (NPT), agreeing to prevent the spread of nuclear weapons and to work towards eliminating them. The NPT went into effect in 1970, but the number of nations with nukes has nearly doubled and there is still no timetable to eliminate nuclear weapons. A people's movement has grown to convince governments to rid the world of the nuclear threat. More than 250 municipalities around the world have declared themselves as Nuclear Free Zones.

Many also worry about nuclear energy which produces wastes that can't be safely disposed, threatening our environment and our future.

August 6, Hiroshima Day (No Nukes Day), is an opportunity to raise awareness about the threat of nuclear weapons and the dangers of nuclear energy. It's the perfect time to urge your Mayor to declare your city a Nuclear Free Zone.

"We must not only control the weapons that can kill us, we must bridge the great disparities of wealth and opportunity among the peoples of the world, the vast majority of whom live in poverty without hope, opportunity or choices in life. These conditions are a breeding ground for division that can cause a desperate people to resort to nuclear weapons as a last resort. Our only hope lies in the power of our love, generosity, tolerance and understanding and our commitment to making the world a better place for all..."

The fact that lately some circles...have been actively promoting certain theories, as dangerous as they are illusory, of a "limited", "winnable" or "protracted" nuclear war, as well as their obsession of "nuclear superiority", make it advisable to bear always in mind that the immediate goal of all States, as was expressly declared in the Final Document of the Special Assembly of 1978, "is that of the elimination of the danger of a nuclear war".

# HIROSHIMA DAY - AUGUST 6

"We believe in taking down the barriers, but we also believe in the most energetic reconciliation among peoples by getting them to know each other... It is much harder to kill your near neighbor than the thousands of unknown and hostile aliens at the other end of a nuclear missile. We have to create a world in which there are no unknown, hostile aliens at the other end of any missiles."

**"...nuclear threats and nuclear weapons are the last argument  
of weak, stressed and irresponsible politicians.  
People must act very quickly to stop the movement to nuclear war."
