WHAT'S YOUR BETTERWORLD ISSUE? NO NUKES

"As a doctor, as well as a mother and a world citizen, I wish to practice the ultimate form of preventive medicine by ridding the earth of these technologies that propagate disease, suffering, and death."
-- Dr. Helen Caldicott

On August 6, 1945 the US dropped an atomic bomb on Hiroshima, Japan, and three days later another one on Nagasaki. More than 100,000 people, mostly civilians, were killed. Fortunately, nuclear weapons have not been used again, but they remain a constant threat. Thousands of nuclear weapons remain on alert, ready to be fired at a moment's notice. These bombs could go off at any time by accident or at the hands of terrorists.

Recognizing the danger, most nations signed the Non-Proliferation Treaty (NPT), agreeing to prevent the spread of nuclear weapons and to work towards eliminating them. The NPT went into effect in 1970, but the number of nations with nukes has nearly doubled and there is still no timetable to eliminate nuclear weapons. A people's movement has grown to convince governments to rid the world of the nuclear threat. More than 250 municipalities around the world have declared themselves as Nuclear Free Zones.

Many also worry about nuclear energy which produces wastes that can't be safely disposed, threatening our environment and our future.

No Nukes Day, often called Hiroshima Day, is an opportunity to raise awareness about the threat of nuclear weapons and the dangers of nuclear energy. It's the perfect time to urge your Mayor to declare your city a Nuclear Free Zone.

"We must not only control the weapons that can kill us, we must bridge the great disparities of wealth and opportunity among the peoples of the world, the vast majority of whom live in poverty without hope, opportunity or choices in life. These conditions are a breeding ground for division that can cause a desperate people to resort to nuclear weapons as a last resort. Our only hope lies in the power of our love, generosity, tolerance and understanding and our commitment to making the world a better place for all..."

"A common denominator in every single nuclear accident -- a nuclear plant or on a nuclear submarine -- is that before the specialists even know what has happened, they rush to the media saying, 'There's no danger to the public.' The fact that lately some circles...have been actively promoting certain theories, as dangerous as they are illusory, of a "limited", "winnable" or "protracted" nuclear war, as well as their obsession of "nuclear superiority", make it advisable to bear always in mind that the immediate goal of all States, as was expressly declared in the Final Document of the Special Assembly of 1978, "is that of the elimination of the danger of a nuclear war".

"The time has come for those nations that rely on the force of nuclear armaments to respectfully heed the voices of peace-loving people, not least the atomic bomb survivors, to strive in good faith for nuclear disarmament and non-proliferation, and to advance towards the complete abolishment of all such weapons."

"Today, every inhabitant of this planet must contemplate the day when this planet may no longer be habitable. Every man, woman and child lives under a nuclear sword of Damocles hanging by the slenderest of threads, capable of being cut at any moment by accident or miscalculation or by madness. The weapons of war must be abolished before they abolish us..."

"Hope is not enough to change the world, to bring peace, to end starvation and poverty, to provide a decent education for all children, or to prevent nuclear holocaust. Yet it is a critical starting point for building a better and brighter future. All of us are challenged to connect hope to action until we have created a mighty river that will carve a new path to the future."
